ABOUT ME

Passionate Full-Stack Developer with hands-on experience in building scalable web applications using modern React, Next.js, and Node.js ecosystems. Proficient in designing robust REST APIs, managing databases (PostgreSQL & MongoDB), and implementing dynamic front-end interfaces. Focused on writing clean, maintainable code and delivering user-centric solutions.

SKILLS

Programming Languages & Core Web

CSS3 / JavaScript (ES6+) / TypeScript / HTML5

Front-End Development

Next.js / Redux Toolkit / Tailwind CSS / Bootstrap / Context API / React.js / React Hook Form / ShadcnUI / Refine

Back-End Development & Security

Node.js / Express.js / JWT Auth / Better Auth / Appwrite / Custom SMTP / RESTful APIs

Databases & ORM

PostgreSQL / Prisma ORM / MongoDB / Mongoose

Automation & Background Workflows

Nodemailer / QStash / Upstash Workflow

Developer Tools & Platform Services

Git / GitHub / Vercel

PROJECTS

QMenu – Digital Restaurant Menu Platform Write here the description...*Full-Stack Web Application | Next.js, React 19, TypeScript, Prisma, Tailwind CSS, Cloudinary*

- **Description:**
  - Engineered a full-stack digital menu SaaS platform enabling restaurants to manage dynamic menus, categories, and media assets in real-time.
  - Built a high-performance UI using **React 19**, **Next.js**, and **Tailwind CSS**, delivering an intuitive, responsive mobile-first user experience.
  - Implemented secure backend server actions and database schema management using **Prisma ORM**.
  - Integrated **Cloudinary** for scalable image hosting, featuring client-side file size validation and optimized stream handling to ensure fast loading times.

Classroom & User Management Application Role: Full-Stack Developer**Technologies:** React, Refine, Express.js, MongoDB, Better Auth, Arcjet, Vercel**Key Achievements:**

- Developed a full-stack classroom management system featuring dynamic dashboards and role-based access controls.
- Integrated a responsive **React** and **Refine** front-end with an **Express.js** and **MongoDB** back-end architecture.
- Enhanced application security using **Better Auth** and implemented rate-limiting protection via **Arcjet**, deploying the live application on **Vercel**.

Healthcare & Patient Management Platform Role: Full-Stack Developer**Technologies:** Next.js / React, Node.js, TypeScript, PostgreSQL / MongoDB, Tailwind CSS, Better Auth**Key Achievements:**

- Developed a comprehensive healthcare management platform to streamline patient appointments, medical records, and doctor scheduling.
- Implemented secure authentication and fine-grained Role-Based Access Control (RBAC) to protect sensitive patient data.
- Designed responsive dashboards for healthcare providers and patients using modern React patterns and Tailwind CSS.
- Integrated efficient server API endpoints and database models to ensure reliable and fast data retrieval.
